Career Profile

Undergraduate student at Ionian University

Experiences

BSc in Computer Science

2015 - 2021

Ionian University, Corfu

The graduate of the Department of Informatics has the scientific and technical expertise to work as an IT professional, either as self-employed, or as an executive in the private or public sector. More specifically he can be employed as:

- Software Engineer
- Computer Systems Engineer
- Network and Telecommunications Engineer / Administrator
- Database Administrator

Web Developer, Networking & Automation Technician

06/2021 - 08/2021

Smart Technologies, Volos

Internship allows students to obtain realistic views on employment relationships, the level of earnings and the labor market. It includes activities related to the subjects of the Department. These activities may concern:

- Software development that companies can use to improve their operation on an administrative and technical level.
- Software operation and the ability to use tools of modern technology.

Projects

Backwoods Of Dismay - A uni-project turned first person horror game made with Unity.
